Forecast for Saturday 21 Nov 2020

Weather: Cloudy this morning with outbreaks of rain and drizzle. From early afternoon the rain will become more persistent, especially across western areas, where it may also become locally heavy. The rain will clear from the north later this evening, with dry but largely conditions following.

Chance of cloud free mountain/hill tops above 600m: Nil to 20%, extensive cloud base 600m, patches to 300m at times. Through the evening becoming 90% as cloud bases lift.

Visibility: Moderate or poor at times in rain and drizzle. Very poor with hill fog. Otherwise good at times at lower levels, especially this morning, and again this evening.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Navigational difficulties expected at height due to extensive low cloud. Also gales at height this morning.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Fri 20 Nov 2020	3.8mm	10.6mm	15mm

Forecast for Sunday 22 Nov 2020

Weather: Dry and cloudy at first, but by daybreak cloud breaks are likely to have arrived from the north, allowing temperatures to fall quickly, especially in northern valleys. Then mainly dry and bright during the morning, but through the afternoon cloud is likely to increase again bringing a chance of occasional light rain, and also through the evening.

Maximum wind: West 10 to 20 gusting 30mph

Chance of cloud free mountain/hill tops above 600m: 90%, cloud mainly above the summits.

Visibility: Very good or excellent, occasionally falling moderate or good with rain.

Temperature: **Valleys:** Plus 2 Celsius rising to 9 Celsius
At 600m: 3-5 Celsius
Freezing level: 1500m falling to 1000m
